

Research proposal

Title: Socio-Economic conditions of the workers of brick making industry- A case study of Lalgola block.

Introduction:

- The brick industry is an important industry in Lalgola block, as it is essential for construction sector. The brick industry is mainly an unorganised sector which generate income to rural people. The industry consists of several steps which are labour intensive in nature. Lalgola block is one of the important block in terms of brick making. There is 64 brick kiln in this Lalgola block

Objectives:

- To determine the present socio-economic condition of the brick kiln workers.
- To investigate about their problem
- To provide measures to uplift their living standard.

Research Methodology:

- Data information will be collected basically from primary sources like brick kiln entrepreneurs and labours working in the brick firms. Questionnaire will be prepared with the related questions. No of respondents will be taken 100. Different software will be used to produce map like TNT MIPS, Q-GIS etc.
